Test Document

Srikanth Pendem

May 25, 1996

This is a sample document using Latex Documenting software.

1 1st section title

Here we can write content related to the section.

It is same as Word Processor but purposefully used for Documentation

This function prints the text in Bold

This function prints the text in Italics

2 2nd section title

Here we can write content of related to the section.

Paragraph: Here we write some content with subtitle or the paragraph.

I can also use some special characters like this ˆ # $.
I can make an equation like this $A = 55(2x + 5)(3x + 6)/!5$.

3 Coding

we can write code as follows

```
#include<stdio.h>
int main() {
    int a = 5;
  if(a==5) {
   printf("Hello world");
  else
   return 1;
}
}
```
